

I have a relatively long commute each morning through highly congested areas and I rely on XM Instant Traffic & Weather to help me shorten my commute and avoid frustration. I work long hours and value my free time and time spent with my family tremendously, and I've found that I have more of it since I've been taking advantage of the information XM Instant Traffic provides. I strongly urge you to reject petition 04-160 which threatens to take away things that honestly have a noticeable positive impact on my day-to-day life.

Sincerely,

Karl Eickmeyer
